

Photography Service Booking System

A platform where clients can book photographers, select packages, choose dates, and make payments online. I organized these features based on the Planfy & Setmore photography service booking system website.

1. Core Modules

A. User Panel (Client)

- Create account / login
- View photography packages
- Check photographer availability
- Book a service
- Online payment
- Booking status tracking (Added by me)
- View & booking history
- Review & rating system
- Cancel / reschedule booking

B. Photographer Panel

- Manage profile
- Upload portfolio photos
- Set available dates
- View assigned bookings
- Accept / reject booking requests (added by me)
- Chat/messaging with clients

C. Admin Panel

- Manage users (clients & photographers)
- Manage packages & pricing
- Approve/assign photographers
- View all bookings

- Payment management
- Discount
- Reports (Daily/Monthly Revenue)
- Dashboard analytics

2. Photography Services / Packages

These can be added as categories:

- Wedding Photography
- Reception Photography
- Birthday Event (added by me)
- Corporate Event
- Pre-wedding Shoot
- Baby Shoot
- Product Photography
- Fashion Photography (added by me)

Each package may include:

- Duration (e.g., 2 hours)
- Number of edited photos
- Raw files included or not
- Price
- Extra add-ons (Drone, Cinematic video, Extra hours)

3. Technical Features

Core Functionalities

- Service booking
- Photographer assignment (manual) [Future growth will be auto]
- Time-slot management
- Ratings & reviews
- Notifications (Email) using SMTP
- Payment Gateway Integration

- Invoice generation
 - ☐ Invoice Number (unique ID)
 - ☐ Customer Name & Contact
 - ☐ Photographer Details
 - ☐ Service Package Name
 - ☐ Event Date & Time
 - ☐ Price
 - ☐ Discount (if any)
 - ☐ Total Amount
 - ☐ Payment Status (Paid / Unpaid)
 - ☐ Payment Method (bkash/Nagad/Card)
 - ☐ Company Branding (Logo, Address)

5. Admin Dashboard Analytics (added by me)

- Total bookings
- Total revenue
- Top photographers
- Popular packages
- Monthly booking chart
- Pending/confirmed/cancelled booking stats

✓ Tech Stack (I want to Use)

- **Frontend:** HTML5, CSS, Bootstrap 5, JS
- **Backend:** Django / ASP.NET Dotnet Core
- **Database:** PostgreSQL / MySQL
